

Proquerio

Building with ease.

The Problem

Architects spend too much time looking for materials.

The current system is **inefficient**.

Paper Catalogs

Finding materials
that match exact
specifications

Compare Prices

Hundreds of
manufacturers to
search through

Bulk Order

Overpricing,
no discounts

Repeat for hundreds
of materials

The Solution

With a clean, text-based interface, Proquerio is a platform-as-a-service that allows users to **input** specifications, **find** the best products, **compare** prices, **collaborate** with coworkers, and bulk **order** at the lowest prices - all from the ***same app.***

Text

Text Proquerio

Proquerio finds
the best deals
and discounts

Bulk Order

Proquerio
makes sure

Proquerio aims to help architects, building contractors, and construction workers spend less and build more.

We have the potential to greatly reduce the amount of time spent on collecting materials.

The Timeline

Time (total)	Description
1 month	Customer Segmentation, Market Research
2 months	Research for Natural Language Processing, Machine Learning
3 -5 months	Build MVP with texting, file sharing, and group messaging functionalities
6 months	Testing and Private Beta release

\$1,500 approximated cost for market research, development research, and development

The Team

Abhinav Raghunathan:

Founder

Abhinav is a high school student at WWP High School North in Plainsboro, NJ. He is an experienced programmer who is knowledgeable with Machine Learning and web development.
